Experienced full-stack web developer with one and a half years of IT experience, specialized in backend development. Demonstrated proficiency as a backend developer at Green Lantern IT Solutions and as a systems engineer at Infosys. Skilled in building complex and efficient APIs for reputable organizations. Adept at leveraging a diverse range of technologies to deliver high-quality solutions.

Work EXPERIENCE

Green Lantern IT Solutions – (February 2023 - September 2023)

Backend Developer

- Worked as a backend developer, was one of the two developers to implement the APIs of employee tracking and productivity management Application for a fortune 500 Indian company (internet service provider) in 3 months.
- Designing and implementing RESTful APIs in Nodejs/SQL for seamless integration between CRM systems and external applications.
- Optimizing API performance and scalability to handle large data volumes and concurrent requests.
- Ensuring API security and access control through JWT authentication mechanism.

Infosys – (September 2021 - October 2022)

System Engineer

- Worked as a business analyst at Infosys for a UK based energy giant
- Primarily worked on master data management, where we brought master data from multiple old Mostly onsite systems, to cloud which helps reduce data redundancy and improve quality of data
- Various downstream systems can consume master data from one source of truth, which helped client reduce cost and quick access to master data across multiple countries

Education

- Bachelor of computer science & Engineering 2017 - 2021.

Technologies and Languages

- JavaScript, Typescript, SQL, HTML, CSS, React.js, Node.js, express.js, Python, data structures and algorithms.

Projects

Board Game – [Game live Link](#)

- Developed this board game, “Anjinam”, currently not available online, showcasing creative problem-solving and programming skills

LinkedIn Clone – [Github Link](#)

- Build a LinkedIn clone from scratch using React.js express.js, MySQL
- With features such as JWT auth, messaging, etc
